PROFESSIONAL SUMMARY

Having just completed a intensive Coding Boot-camp at UNC with an A-Average, and I am actively searching for any sort of job or gain experience in the Full Stack Developer field. I've dealt with working in teams with talented Full Stack engineers and not so talented ones but the outcome was a complete and functional product every time, I am confident I will be an asset to your organization. And if I still don't meet qualifications I will work hard to learn the company's technologies to surpass your expectations.
I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

  an A- average.
  Graduated: August 2019

PROJECTS

Ding-Su: Gaming Coach Website || July 3, 2019
- HTML, CSS, JavaScript, jQuery, MongoDB, AngularJS, TSQL
- Full MEAN Stack Application
- Https://github.com/pcharpia6/project-2
- Https://unch-project-2-group-4.herokuapp.com/

A project created for people who really enjoy a certain game but their not the best at it. That's where Ding-Su comes in you can submit recordings of your game play and one of you coaches will get back to you and schedule a 1 on 1 session on how to improve.

Sakura: Gardening meet-up Website || August 22, 2019
- HTML, CSS, JavaScript, jQuery, MySQL, React
- Full MERN Stack Application
- Https://github.com/Jernical/Sakura-Main

Sakura aims to bridge the gap between those who have gardens but not the time to garden, and those who have the inclination to garden but not the space. It fosters the connection between an aspirational class of gardeners in apartments and those who would like gardens but don't have the energy/time to put into them. Sakura works in a similar manner to a dating app, with preferences tailored to gardening rather than dating.
